SPK555 bluetooth speaker

Compact and versatile!

The 6-watt Bluetooth speaker will be useful wherever there is no access to electricity. It is light and handy, so it will never be too heavy for your luggage. It supports USB and micro SD media, and also has an AUX-in auxiliary input, making it useful for everyone.

Why is it worth having?

A portable speaker is one of the basic accessories of people who do not like to part with their favorite pieces. The presented model works up to 4 hours with a sensitivity of 80/- 3 dB. This is possible thanks to the built-in 800 mAh battery. The power is also satisfactory, especially if you take into account the compact size of the device. You can take the loudspeaker with you to work in the garden, to a warehouse or a longer walk, picnic or bicycle trip.

What else is worth knowing?

The speaker can be placed in the best place and controlled via Bluetooth, which will be most useful during relaxation. It also receives the signal of radio stations (FM) and can be used as a speakerphone if needed, eg when you want to call an absent friend together at a party and greet him. It will surely bring a smile to his face!
